

Exhausted powder recovery from fire extinguishers into Big-Bag containers

Model Totem-BAG-Cargo

Easy and economical dry powder recovery equipment from extinguishers to BIG-BAG

> Totem-BAG-Cargo

Applications

Totem-Bag-Cargo allows to recover the dry powder from fire extinguishers, both portable or wheeled, storing it directly into a Big-Bag container.

Its dimensions allow installation in fixed or mobile workshop.

Description

The station allows to rationally run the periodical recovery of extinguishing powder according to what is required for fire extinguishers overhaul.

The recovery is made directly by pressurized extinguishers without using any driving force if not the same pressure of the extinguisher.

Powder is conveyed from extinguisher to the charge separator by the flexible hose and is directly discharged into the Big-Bag container.

The recovery flexible hose is equipped by fast coupling allowing a fast connection of the extinguisher.

Charge separator is fitted with a microporous "Long-Life" and high efficiency filter.

Support frame, of reduced dimensions, allows to install the equipment in a mobile workshop than that in a standard fixed workshop.

The base of the support frame, with double lifting side, allows to move the "Totem-Bag-Cargo" with transpallet or forklift.

It is even possible to install the equipment in a workshop without the use of the frame base, in order to support the wooden-pallet on ground and then handle it (filled Big-Bag removal) only by a manual transpallet.

Exhausted powder recovery from fire extinguishers into Big-Bag containers

Powder recover from pressurized fire extinguisher

COMPONENTS

- 1. Support frame
- 2. Charge separator
- 3. Big-Bag for powder recovery
- 4. Extinguisher support rest surface
- 5. Extinguisher under powder recovery
- 6. Vice type VIF (optional)
- 7. Recovery flexible hose
- 8. Base with double lifting side

STANDARD ACCESSORIES

Base with double lifting side
Powder recovery flexible hose
Fast coupling for fire extinguishers connection
Extinguisher support rest surface
User manual

MODELS AND TECHNICAL DETAILS

MODEL	Totem-BAG-Cargo
CODE	MPGT007
POWDER DISCHARGE INTO THE BIG-BAG	Direct
PORTABLE FIRE EXTINGUISHERS RECOVERY	Yes
WHEELED FIRE EXTINGUISHERS RECOVERY	Yes
INSTALLATION IN A WORKSHOP	Yes
INSTALLATION IN A MOBILE WORKSHOP	Yes
ELECTRICAL POWER SUPPLY (Volt/Hz)	Not Needed
COMPRESSED AIR POWER SUPPLY	Not Needed
DIMENSIONS (mm)	1200x1600x(h)1700
WEIGHT (Kg)	110 ~
