

Trolley for on-site fire extinguisher service

CADDIE-BENCH model

ADVANTAGES

The Caddie-Bench consists of a stainless steel framework and a revolving vice allowing to rotate the extinguisher upside down and thoroughly shaking the dry powder.

The 4 polar positions (0°, 90°, 180° and 270°) enable the extinguisher to be fully checked and serviced.

The unit can be also equipped with a tool-box for easily transporting the necessary tools and spanners.

The three-wheeled trolley special configuration allows the unit to be easily moved up and down the stairs.

The lowest part of the trolley allows the extinguishers to be moved easily when the operations are carried out in different locations (e.g. mobile workshop).

COMPONENTS AND DEVICES

- > 360° rotating manual vice
- > Adjustable support for different sizes of extinguishers
- > 4 defined rotating positions (0°, 90°, 180°, 270°)
- > Stainless steel framework
- > Frontal support for extinguisher
- > Triangular wheels configuration for easily moving it on stairs

STANDARD EQUIPMENT

- > Swinger rotating manual vice
- > Tool box

APPLICATIONS

The Caddie-Bench unit has been specifically designed for fire extinguisher control and service. It is particularly suitable for on-site checking operations.
