

Cylinder inverter

GB/6 series

Highest quality and performance

APPLICATIONS

Unit designed to tilt cylinders upside-down, mainly emptying residual water after testing.

On demand, the unit can be equipped with an air compressed manifold and a special nozzle to spray compressed air inside the cylinders once tilted, in order to speed up the emptying of the residual water.

TECHNICAL SPECIFICATIONS

- Painted steel structure
- Ball bearing for rotation
- Inversion by a not reversible gearbox drive, assuring safety in case of blackout
- Height tensile strength chain drive
- Cylinder clamping with airless safety system (spring lock device)
- On/off cylinder clamping valve
- Un-tilting device with cylinder unclamped
- Bulkheads, on lateral side, with photoelectric cell to stop the cylinder tipping if someone walks in the tipping area
- Electric board control
- Tin protection case
- Clamp jaws with plastic cover
- Air inlet reducer

Mixing inverter for cylinders

GB/6 TRANSFORMED INTO FIT50 TEST BENCH

TECHNICAL FEATURES

- Available for 2 / 4 / 6 cylinder places
- Set to be transformed into a test bench, such as FIT50 model (GB6 only)

GB/6 model (code MZRE010) FEATURES

- Electric power supply: 400V 50Hz three-phase
- Electrical power: 2 kW
- Air supply: 8 bar
- Cylinder places: 6
- Cylinder diameter: $\varnothing 140 \div 235$ mm
 $\varnothing 140 \div 270$ mm (with adapters)
- Cylinder height: 900 \div 1800 mm
- Tilting time: about 10 seconds
- Dimensions: 2240 x 2950 x 1750 (h) mm
- Weight: 450 kg

WATER TANK, BWT model

OPTIONAL ACCESSORIES

- Power supply according to customers' standard
- Special models for different cylinders diameters/heights differing from the standard ones
- Compressed air manifold with a special nozzle for each cylinder place, in order to speed up emptying the cylinders from water after testing
- Tank to recover water residual, BWT50 model
